## PRODUCT DATA SHEET

### DESCRIPTION & FEATURES

ELASTOPHENE Flam HR 2.2 (high resistance) is an SBS-modified bitumen base ply for use in approved multi-ply membrane and flashing assemblies. ELASTOPHENE Flam HR 2.2 is composed of a proprietary formulation of elastomeric styrene-butadiene-styrene (SBS) polymer modified bitumen and is reinforced with high performance glass scrim. The topside and underside are surfaced with polyolefin burn-off film to optimize heat welding.

### STORAGE & HANDLING

Store rolls on end and maintain in an upright position to prevent damage. Store rolls in a clean dry location and cover as necessary to protect rolls from environmental damage such as extreme cold, heat, or moisture. Monitor varying environmental conditions during storage, handling and application of ELASTOPHENE Flam HR 2.2.

### APPLICATION

Prior to installation, unroll ELASTOPHENE Flam HR 2.2 onto the roof surface and allow to relax. Position ELASTOPHENE Flam HR 2.2 in desired position and back roll the product. ELASTOPHENE Flam HR 2.2 is then heat welded to approved substrates. Subsequent approved inter-ply or cap ply membranes are applied to ELASTOPHENE Flam HR 2.2 via heat welding. Refer to the SOPREMA SBS Roofing Manual for additional application guidelines.
