

PRODUCT DATA SHEET

DESCRIPTION & FEATURES

SOPRALAP Stick is an SBS-modified bitumen cover strip for use with SOPRASMART Laminated Board products. SOPRALAP Stick is composed of a proprietary formulation of elastomeric styrene-butadiene-styrene (SBS) polymer modified bitumen and is reinforced with tough, dimensionally stable composite polyester/glass fiber reinforcement. The topside is surface with fine mineral aggregate and the underside is surfaced with protective polyolefin release film that is removed during application.

STORAGE

Store rolls on end and maintain in an upright position to prevent damage. Store rolls in a clean dry location and cover as necessary to protect rolls from environmental damage such as extreme cold, heat, or moisture. Monitor varying environmental conditions during storage, handling and application of SOPRALAP Stick.

APPLICATION

Prior to installation, unroll SOPRALAP Stick onto the roof surface and allow to relax. SOPRASMART boards are butted end to end, with a membrane overlap of 1 inch. Place SOPRALAP Stick in desired position, centered over the board joint, and back roll the product. Remove the protective release film from the underside of the sheet and roll SOPRALAP Stick into place with a weighted roller. Refer to the SOPREMA SBS Roofing Manual for additional application guidelines.

PHYSICAL PROPERTIES

Thickness, mil. (mm)	98 (2.5)
Reinforcement	Composite
Topside	Sanded
Underside	Self-adhered with release film
Dimensions, in (m)	13 x 39 (0.33 x 12)
