SOPRALENE STICK

SOPRALENE Stick is composed of a proprietary formulation of elastomeric styrenebutadiene-styrene (SBS) polymer modified bitumen in combination with a high tack self-adhesive layer and is reinforced with a tough, dimensionally stable nonwoven polyester mat.

SOPRA-TITE Coping offers a full snap-on design in 12 foot lengths with pre-punched fastening holes to ensure proper attachment to the building substrate. SOPRA-TITE Coping is available in a variety of versions, including flat, tapered, double tapered, existing slope, radius and continuous cleat. SOPRA-TITE has concealed splice plates with dual non-curing isocrylbutyl sealant strips.

- Factory Mutual approved in select versions for wind uplift protection
- MIAMI-DADE approved to comply with the High Velocity Hurricane Zone of the Florida Building Code
- Corrosion resistant, stainless steel springs are factory attached to the anchor clips and provide long-term, positive spring loading
- Decreased labor costs due to ease of installation
