

SOPRA-TITE® SENTINEL® FASCIA ROOFING

ROOFING &
WATERPROOFING

SOPRA-TITE SENTINEL Fascia combines custom engineering and superior performance with an attractive appearance. The design of the extruded aluminum anchor bar securely terminates the membrane, providing superior protection.

This top-line fascia provides the maximum protection against wind uplift damage. Rigorously tested, SOPRA-TITE SENTINEL Fascia is proven to be compliant with all relevant building codes. Additionally it is easy to install, reducing time and labor and saving costs.

- Carefully designed and ANSI/SPRI/FM 4435/ES-1 Tested to comply with the International Building Code
- Factory Mutual approved for wind uplift protection
- Full snap-on design with extruded aluminum bar
- Decreased labor costs due to ease of installation
- No need for stripping-in or heat welding that are typical with other systems

SENTINEL COPPER ART P150 HFB

SENTINEL Copper Art P150 HFB is a high performance, polyester reinforced, fleeced-back, thermoplastic polyvinyl chloride (PVC) roof membrane, specially designed to provide un-matched flexibility and long-term performance. SENTINEL Copper Art utilizes a specialized process that allows copper metal powder to incorporate into the PVC blend, producing a non-pigmented copper/PVC membrane.
