ONE PIECE SURFACE MOUNT

SOPREMA Counter Flashing is designed to provide a watertight termination at the leading edge of the roofing material. SOPREMA Counter Flashings are manufactured in 12 foot lengths with pre-punched notched holes for quicker installation. Slotted fastening holes allow for proper thermal movement of the materials and ensure correct fastener placement and spacing. The flashing hooks and rotates to snap into the receiver for easier installation of two piece versions. SOPREMA Counter Flashing is also available in one piece surface mounts.

- Provides a watertight termination
- Decreased labor costs due to easy installation
- Standard and custom finishes are available
- Available in surface mount, thru-wall, or reglet versions.
